Introduction

Your home reflects your individual style – and so too should your door hardware. From the flowing curves of a statement entrance handle to the bold contemporary lines of a stainless steel lever, Schlage products come in a range of classic and contemporary collections so you can expertly tie together your perfect space.

For more than 95 years, Schlage has offered the most durable and stylish door hardware in a range of unique style combinations. Bridging the gap between security and design, Schlage makes it easier for you to match strength with your individual style. As that style continues to evolve, you can be confident that Schlage will always have door hardware designs to not only complete your room, but show off your personality.

So welcome home. Welcome thousands of possibilities. Welcome style.

Total Solutions

Schlage is part of the Allegion family, providing comprehensive solutions for residential and commercial security requirements.

Independently or as an integrated total solution, we can tailor an option to suit your individual security and safety needs for home and business.

Designer style

Verta™ reinvents the classic with contemporary design. Stemming from modern trends, Verta™ blends beautiful form with designer functionality.

Verta's™ design features set a new standard for innovative style. Architectural lines create surfaces that reflect light in every direction; tactile surfaces surprise and delight; lineal planes soften to curved edges.

Each element of Verta has been sourced, crafted and finished by experts. Constructed from the highest-quality, marine-grade 316 stainless steel, Verta is manufactured and finished with watch-maker precision. Tested to over 200,000 cycles, Verta is an investment in style for now and the future.

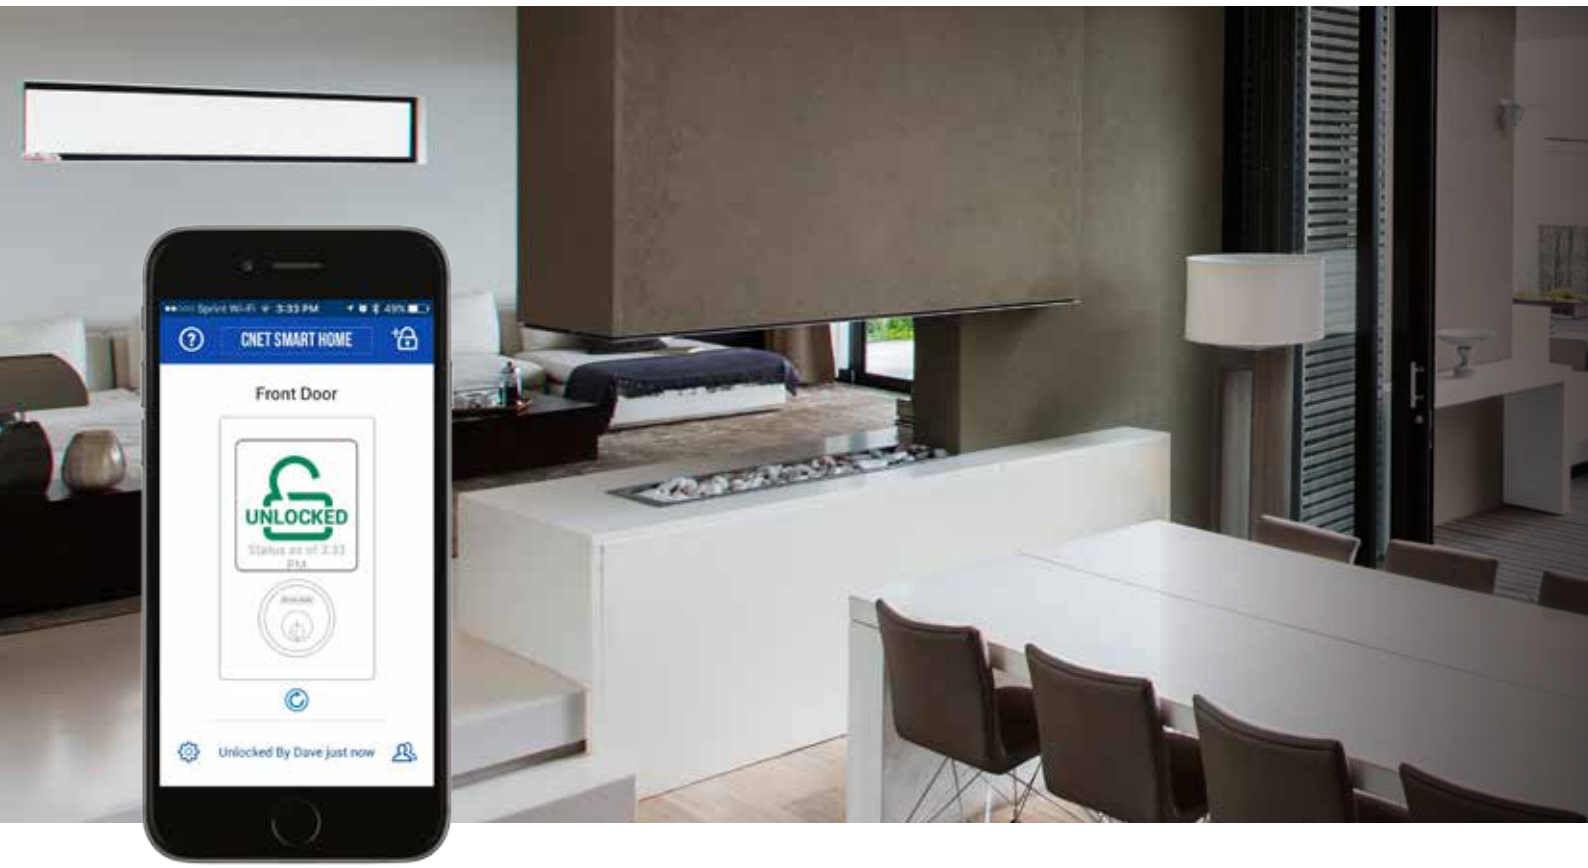
Keyless entrance hardware



A smarter way in

Compatible with Apple Homekit™ Technology, allows you to unlock your door by simply asking Siri on your iPhone®, iPad® or iPod touch®. That HomeKit™ compatibility also puts you in control of the rest of your home, giving you the power to set scenes for things like your lights, doors, and thermostats. Which means the Schlage Sense™ deadbolt doesn't just make your home smarter – it makes your whole life easier.

Features and Benefits

- Works with iPhone®, iPad® and iPod touch® by using Bluetooth® Smart technology
- Built-in alarm technology senses potential door attacks
- Illuminated, fingerprint-resistant touchscreen works in the rain and when wearing gloves
- Easy to set up and program using the Schlage Sense™ app
- The Schlage Sense™ Smart Deadbolt comes with a limited lifetime finish and mechanical warranty, and a limited three-year electronic warranty

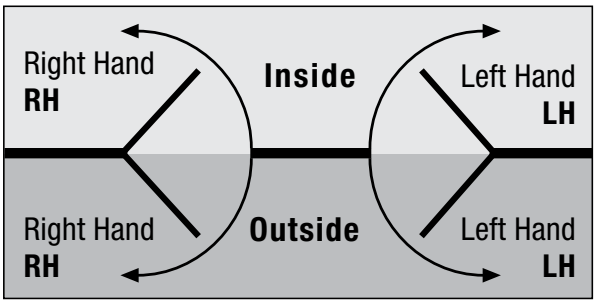
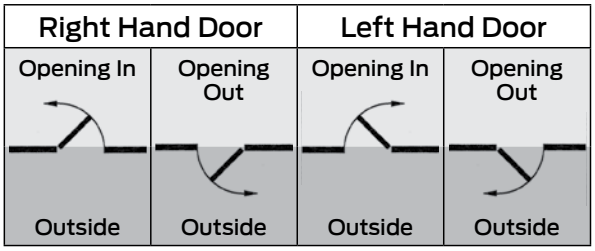
Door Handing Guide



Hinge Handing Guide (Model 13227)

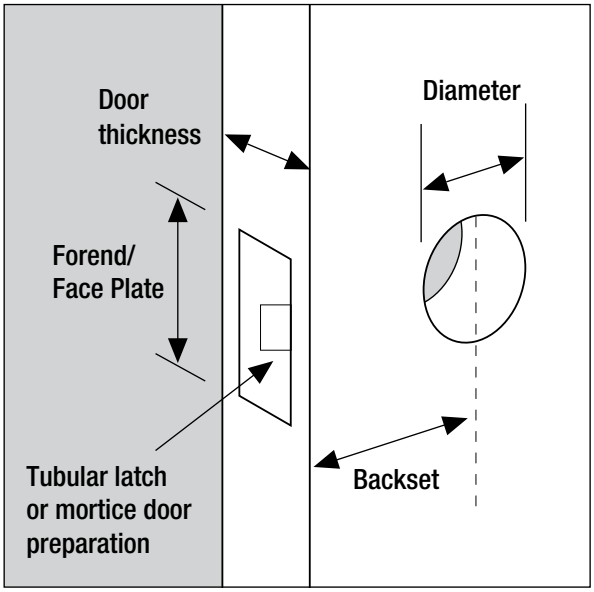


Common Terms

Door Preparation - A term used for the cut-outs or holes made to the door for the particular lock being installed.

Backset - The distance from the edge of the door to the centre line of prep in door.

Door Thickness - The measurement from outside front through to outside back of door. All locks have a minimum / maximum door thickness which they will fit.



Building Partnership Programme

Built around the architectural hardware requirements for new homes (essentially the door furniture and locks), the Building Partnership Programme is a mutually beneficial arrangement between you, the hardware merchant and Allegion. It is also a response to the particular desire by building companies for quality, well designed products, robust warranties, simple but effective key control, and time-saving installation.

Services

Scheduling – A comprehensive door schedule specification service is provided. Door hardware schedules are available with no obligation.

Residential Construction Keying - RCK system, involves a single key, replicated to be used by tradesmen for all homes during the construction phase. Building companies will be supplied 25 keys free (additional keys by negotiation), which can be reused on future houses/apartments. Each building company receives a personalised RCK system, so no two building companies have the same keys. When the new homeowner takes over the house, they are presented with their own keys, which when used automatically resets the lock cylinder, making the RCK inoperable and providing the homeowner with their own unique combination.

Master Keying – Master Keying is a method of controlling access through a building. A key schedule is prepared from provided floor plans. Includes a key tracking system which locates keys and locks and keeps a secure procedure on what keying has been undertaken. Security is based on a system where one lock has its own key. This key will not operate any other locks in the system however where all locks are in the same system the locks can be operated by the one master key.

Keyed Alike – KA - More than one lock being operated by the same key.

Keyed To Differ – KD – One lock is opened with a single key
